2003 Annual Report

December 2003

Published by the Division of Vocational Rehabilitation Missouri Department of Elementary and Secondary Education 3024 Dupont Circle, Jefferson City, MO 65109 Web site: vr.dese.mo.gov

#### THANK YOU

At the November 2003 SRC meeting, Betty Chandler, Council Chairperson, presented Ron Vessell, Council Ex Officio Member and MDVR's Assistant Commissioner, with a cake and gift in honor of his retirement.

THE COUNCIL WISHES TO EXPRESS appreciation and gratitude for the many contributions that Ron Vessell has made to both the council and to the Missouri Division of Vocational Rehabilitation. As of December 31, 2003, Ron Vessell retired from his position as assistant commissioner of Vocational Rehabilitation. Mr. Vessell began his career with the division 28 years ago as a vocational rehabilitation counselor in the Olivette District Office in St. Louis, Mo. Throughout all of his years in counseling and administration, Mr. Vessell never waivered in his vision — to clear the road for persons with disabilities seeking employment and independence in their lives.

Mr. Vessell served on the council as an Ex Officio Member since July 1997. He has been a tireless advocate for persons with disabilities on both the state and federal levels. In his ex officio capacity, he worked under the council's advisement on such significant issues as:

- "informed choice" for consumers
- methods to obtain consumer satisfaction information and strategies to use the data to enhance services
- Rehabilitation Services Administration's (RSA) decision in 2001 to change the definition of employment outcomes to reflect only integrated competitive settings, thus excluding sheltered workshop employment outcomes
- the waiting list (Order of Selection) for services initiated in the fall of 2003

The council recognizes Mr. Vessell's achievements in enhancing the quality of life for persons with disabilities. No doubt, his passion for serving others will continue even beyond his retirement from the division.

#### Missouri State Rehabilitation Council

#### **Our Vision**

The Missouri State Rehabilitation Council envisions a society that values all of its members equally and provides opportunities so that all people are able to meet their needs, fulfill their dreams and participate in society.

#### Our Mission

To assure that persons with disabilities have opportunities to be as productive as possible by advising the Division of Vocational Rehabilitation that services provided to persons with disabilities are:

- of the highest quality.
- consumer directed.
- responsive to consumer choice.
- effective.
- individualized.
- culturally specific and relevant to labor market trends.

#### **Our Responsibilities**

To work in partnership with the Division of Vocational Rehabilitation to achieve positive outcomes for persons with disabilities by:

- providing input on the state plan, policies and practices affecting services to persons with disabilities;
- identifying strategies to address the needs of people who are not being served or who are being underserved;
- obtaining and interpreting consumer input;
- identifying corrective action consistent with that input; and
- advocating for adequate resources to assure that the rehabilitation needs of all Missourians are met.

To support the division in complying with applicable laws, such as the Americans with Disabilities Act, the Workforce Investment Act, the Rehabilitation Act, and the Individuals with Disabilities Education Act.

The Honorable Bob Holden Governor of Missouri State Capitol Jefferson City, Missouri 65101

Dear Governor Holden:

On behalf of the members of the Missouri State Rehabilitation Council, I am pleased to present the council's annual report for fiscal year 2003. In these pages, you will find the progress made by Missouri citizens who were served by vocational rehabilitation programs.

Each of the council members have unique experiences in advocating for the rights of our fellow Missourians whose physical or mental disabilities may pose barriers to productive employment. Through our quarterly meetings and committee deliberations, we have given our support to the Division of Vocational Rehabilitation to empower individuals with disabilities and to encourage decisions that lead to greater self-sufficiency.

We have given our enthusiastic support to innovative programming to reach the underserved in the urban areas of Kansas City and St. Louis, to exploring additional methods of obtaining consumer satisfaction feedback, and to expanding in-service training.

It has been my great privilege to work with members of the council, as well as with division staff, all of whom are dedicated to providing our Missouri citizens with the opportunity to make meaningful choices in pursuing their dreams.

Sincerely,

Betty Chandler Chairperson

# Council's Purpose

The State Rehabilitation Council (SRC) was first authorized by the Rehabilitation Act of 1973 as amended in 1998 (referred to hereafter as the Act). Section 105 of the Act requires the state vocational rehabilitation agency to establish a council.

The council was initially formed on June 1, 1993. Council members are appointed by the governor and serve no more than two consecutive three-year terms. As required by the Act, the council is represented by the following:

- Statewide Independent Living Council
- Parent Training and Information Center
- Client Assistance Program
- Vocational Rehabilitation Counselor
- Community Rehabilitation Program Service Providers
- Business, industry and labor
- Disability advocacy groups
- Current or former applicants/recipients of vocational rehabilitation services
- Division of Special Education, the state agency responsible for the Individuals with Disabilities Act
- State Workforce Investment Board

The council is responsible for reviewing, analyzing and advising the Division of Vocational Rehabilitation regarding its performance on such issues as eligibility, services provided to consumers and any other functions affecting people with disabilities.

During FY03, the council was actively involved in a significant number of activities with the division. Some of its accomplishments included:

- Providing recommendations to the division on policy revisions and newly filed administrative rules.
- Collaborating with other councils and agencies, such as the State Independent Living Council, Missouri Parents Act, the Department of Mental Health, Missouri Protection and Advocacy Services, the Division of Special Education and the Governor's Council on Disability.
- Attending division public hearings to provide input on the state plan.
- Working with the division to evaluate consumer satisfaction feedback and providing recommendations based on this feedback.
- Participating in the Council of State Administrators of Vocational Rehabilitation (CSAVR) national meeting in Washington, D.C.
- Reviewing the division's state and strategic plans.
- Working with division staff in preparing the 2003 annual report.
- Providing comments to the Rehabilitation Services Administration (RSA) regarding issues pertaining to waiting lists (Order of Selection).
- Providing SRC nominations for the governor to consider.
- Informing Missouri's U.S. representatives and U.S. senators of the division's implementation of waiting lists (Order of Selection) and the impact these waiting lists have on people with disabilities.

#### Mission Statement

# Missouri Department of Elementary and Secondary Education

#### **Division of Vocational Rehabilitation**

#### "Making a positive difference through education and service"

The Department of Elementary and Secondary Education is a team of dedicated individuals working for the continuous improvement of education and services for all citizens. We believe that we can make a positive difference in the quality of life for all Missourians by providing exceptional service to students, educators, schools and citizens.

#### We provide leadership and promote excellence. We

- ★ champion high-quality services to persons with disabilities.
- ★ advocate equity and access for all persons.
- ★ develop all divisional staff and community service providers.
- ★ establish standards that demand excellence and build a solid foundation for lifelong learning, workplace skills and citizenship.
- ★ evaluate program and policy effectiveness.
- ★ share best practices.
- ★ carry out our mission with economy and minimized paperwork burden.
- $\star$  assist persons with disabilities by providing individualized support and services.
- ★ create a caring workplace that fosters teamwork and personal and professional growth.

#### We promise to greatly exceed customers' expectations. We

- ★ listen to those we serve in order to improve our operations and adapt to changing needs.
- ★ forge partnerships to improve our services.
- ★ value each employee's contribution to achieving this mission.

Ronald W. Vessell
Assistant Commissioner
Vocational Rehabilitation

#### Missouri Department of Elementary and Secondary Education

— Making a positive difference through education and service —

December 31, 2003

The Honorable Bob Holden Governor of Missouri State Capitol Jefferson City, Missouri 65101

Dear Governor Holden:

I am enclosing the annual report of the Missouri State Rehabilitation Council for fiscal year 2003. As required by federal regulation, this report provides information on the Division of Vocational Rehabilitation's employment program for persons with disabilities.

We are pleased to report that 5,563 persons were successfully employed during FY03. The employment success rate for people served was 78.7 percent. Missouri Vocational Rehabilitation consistently ranks in the nation's top ten state rehab agencies in terms of success rate.

The program's customer satisfaction survey results are among the top in the nation, if not first.

Missouri Vocational Rehabilitation works closely with schools to provide transition services to nearly 5,000 students per year in 361 high schools. Last year, we assisted almost 800 students in reaching their employment goals.

The council members take seriously their mission to serve Missouri citizens with physical and mental disabilities. The members bring years of experience and expertise to the council, and it has been my privilege to work with them this past year.

In closing, I along with the council offer our sincere appreciation for your personal interest and support in serving people with disabilities.

Sincerely,

Ronald W. Vessell

Assistant Commissioner

Missouri Division of Vocational Rehabilitation

# Historical Highlights of Vocational Rehabilitation

**1920 • Smith-Fess Act.** First civilian state-federal vocational rehabilitation act. Authorized for four years. *Goal:* promoted vocational rehabilitation of people with disabilities who worked in industrial or any legitimate occupation so they could return to work. *Act provisions:* money allotment to states based on population, matching federal to state dollars \$1 to \$1, state plan requirement, and available to all people of employment age who were incapacitated by a physical defect or infirmity and who might become employable through rehabilitation.

**1935 • Social Security Act.** Doubled appropriation for vocational rehabilitation agencies to nearly \$2 million. Established vocational rehabilitation as a permanent program.

**1943 · Barden-LaFollette Act** (also known as VR Act of 1943). Amended the Smith-Fess Act. Authorized payment for physical restoration (or to eliminate/ reduce a disability); permitted services for people with mental illness; made new provisions for people who are blind; made funds available for the entire cost of state administration; included guidance and placement services; and changed allocation of federal funds from a population base to one of need, as determined by the states.

**1968 • Architectural Barriers Act.** Established accessibility standards for new construction or alterations to federal buildings.

**1973 • Rehabilitation Act Amendments.** *Main points*: severely disabled served first, client/counselor jointly develop client's rehabilitation plan, postemployment services, annual review of eligibility, greater accountability (standards), affirmative action, and evaluation of the primary purpose of the program. *Section 502*: Architectural and Transportation Barriers Compliance Board. *Section 504*: "nondiscrimination for handicapped."

**1978 • Rehabilitation Act Amendments.** Authorized and funded independent living programs and centers. Established the National Institute on Disability and Rehabilitation Research.

**1984 • Rehabilitation Act Amendments.** *Key points*: client can make appeals, Client Assistance Program established.

**1986 • Rehabilitation Act Amendments.** *Key point:* supported employment programs now required in state plans.

**1990 • Americans with Disabilities Act.** Landmark federal anti-discrimination statute. Enacted to address barriers to people with disabilities not only in employment, but in housing, public accommodations, education, transportation, communication, recreation, institutionalization, health, voting and access to public facilities.

**1992 • Rehabilitation Act Amendments.** *Key points:* established eligibility to be determined within 60 days; existing information/client input sought; allowed formation of a council; and emphasized client choice (where people with disabilities are active participants in their own rehabilitation programs, including making meaningful and informed choices).

1998 • Final Regulations of Rehabilitation Act **Amendments of 1992.** *Key points:* extended period from 60 days to 90 days in order for individuals to reach successful employment outcomes; amended the definition of competitive employment to include employment paying minimum wages, but not less than customary wages/benefits by the same employer to non-disabled workers performing similar functions; strengthened the definition of an integrated setting to require actual interaction between people with disabilities who are receiving services and non-disabled workers; and required agencies to develop policies that ensure that each person receives information about the scope of services and that each person's informed choice must be considered when writing the individual rehabilitation plan and vocational goal.

August 1998 • Rehabilitation Act Amendments. Key points: extended authorization of the Act for five years. Emphasis placed on: expanding the exercise of informed choice by individuals with disabilities; streamlining administrative procedures (i.e. reducing state plan requirements, eliminating the strategic plan, renaming the Individualized Written Plan as the Individualized Plan for Employment); increasing high-quality employment outcomes; expanding due-process procedures to include mediation; and linking VR programs to the State Workforce Investment Systems.

## Agency Overview

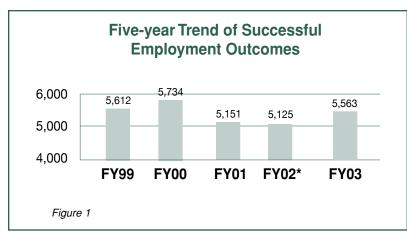

Prepared on behalf of the State Rehabilitation Council, this annual report highlights various programs and services of the Missouri Division of Vocational Rehabilitation during federal fiscal year 2003 (Oct. 1, 2002 to Sept. 30, 2003).

During FY03, vocational rehabilitation counselors worked with more than 29,000 eligible people in various categories. In FY03, 5,563 consumers had successful outcomes out of a total of 7,073 individuals leaving Vocational Rehabilitation (VR) services. Figures 1 (this page) and 2 (page 12) illustrate the number of successful outcomes and the percentages of success during the last five years.

Figure 2 (page 12) shows that more than 78 percent of consumers who received services with VR were successfully employed (this figure is a percentage of all eligible consumers leaving VR who received services). Research, from the Department of Economics, University of Missouri, Columbia, shows that about 70 percent of these consumers will still be employed one year later.

A couple of important items to note from FY03 regarding VR's positive impact on the quality of consumers' lives and the communities it serves:

■ Out of 5,563 successfully employed consumers, only 140 consumers had weekly earnings of \$500 or more at the time of their referral to VR. However, at the time of case closure, the number of consumers jumped to 529 — an increase of 389.

\* As of FY02, successful employment outcome data no longer includes sheltered workshop employment outcome information.

Debra Millett, former consumer, entered the growing field of massage therapy with assistance from VR. She is now employed as a Licensed Massage Therapist.

■ Advanced degrees for consumers who achieved successful employment outcomes rose from the time of referral to the time of closure. For instance, the number of consumers obtaining associate's degrees increased from 284 to 835.

See pages 35 and 36 for additional information on VR's positive impact on consumers' weekly earnings and education levels.

#### Agency Overview (continued)

# Rate of Successful Employment Outcomes (five-year trend) 69.2% 70.7% 70.6% 71.6% 78.7% FY99 FY00 FY01 FY02 FY03 Figure 2

#### **Transition Services**

Many activities occurred in the area of Transition Services during FY03. One major area of focus involved the development of a statewide data base and reporting system that measures and tracks referral information and success rates for students with disabilities who have participated in and received VR Transition Services prior to graduation. Transition Services worked closely with the Division of Special Education in coordinating data collection efforts. Through this expanded data collection system, VR, the special education division and other adult rehab agencies will continue to benefit from joint training and technical assistance activities. Transition Services has improved and expanded through the development of joint Memorandums of Understanding (MOUs) between local school districts, VR district offices and local providers. MOUs outline how transition assessment services for students with disabilities will be provided at the local level. Since FY02, Transition Services has seen an increase in the number of cases that VR opened on students with disabilities prior to graduation, an increase in the number of cases that VR opened on students with disabilities prior to graduation from a secondary school setting, and an increase in the overall success rate for students with disabilities who have been referred to VR for Transition Services prior to graduation.

#### **State Funding**

Support from the governor's office and state legislators meant sufficient funds were available to match federal funding in FY03. VR receives state funds from General

# \$1,595,625 \$1,136,331 \$2,517,513 \$1,631,240 \$1,056,480 FY99 FY00 FY01 FY02 FY03 Figure 3

Revenue, Lottery and Mental Health. The match requirement is 21.3 percent state funding and 78.7 percent federal funding.

#### Social Security Reimbursement Program

The Social Security Administration (SSA) reimburses state vocational rehabilitation agencies for the costs of providing services to successfully rehabilitated SSA recipients. The division continues to seek SSA reimbursements. As of September 30, 2003, the division received \$1,056,480. Figure 3 provides VR's reimbursement totals for the last five years.

#### Agency Overview (continued)

#### **Consumer Satisfaction**

Another priority for the division is consumer satisfaction with division staff and services. The council is responsible for administering a consumer satisfaction survey (pages 29-32). Division staff surveyed all eligible consumers whose cases were closed in FY03. Specific feedback is shared with division management, supervisors and counselors. This information is used as a tool for staff performance as well as to improve services and evaluate training needs.

In FY03, the division surveyed 7,073 consumers who received and left VR services. Of these individuals, 99 percent felt they were treated with respect, and 98 percent indicated they were involved in making choices concerning their employment goals and services.

A pilot project in the Rolla VR office is measuring consumer satisfaction immediately after the initial plan period. As mentioned above, the division measures consumers' satisfaction after they leave VR services. This pilot will give the division an idea of a consumer's satisfaction at the time of service delivery.

#### **Division Teams**

The division continues to enlist the aid of teams consisting of agency staff, providers and consumers to develop recommendations for several strategic plan issues. The following teams meet several times a year: Capacity Building, Case Services, Community Rehabilitation Providers/Vocational Rehabilitation, Consumer Affairs, Technology Services, Transition, Cultural Diversity, and Work Incentives. As a result, a number of recommendations have been implemented to improve services for people with disabilities.

During FY03, SRC members worked with the division on many issues, such as the evaluation of consumer satisfaction feedback and communication with U.S. lawmakers regarding services for persons with disabilities. Pictured (*left to right*) are Diane Spieker, Jim Terrill and Lee Henson, all council members; and Linda Benoit, Council Vice Chairperson.

## Interagency Cooperation

#### **Workforce Development**

In Missouri, the late Gov. Mel Carnahan created the Division of Workforce Development under the Department of Economic Development. Workforce Development ensures that the provisions of the Workforce Investment Act of 1998 (WIA) are carried out by Workforce Development Centers across the state. In July 1999, the Division of Employment Security joined the Division of Workforce Development. In September 1999, the governor designated the Missouri Training and Employment Council (MTEC) as the state board that oversees Workforce Development.

Dyann Greene was the VR Supervisor of Workforce Development until her retirement in November 2003. Dyann traveled the state coordinating the efforts between VR and the Division of Workforce Development to successfully employ persons with disabilities.

There are 14 workforce regions in Missouri. Funds are allocated by formula and eligible training providers have been certified. Under WIA, there are 19 required partners that are working together to provide One-Stop Career Centers (referred to as Career Centers in Missouri) with universal access that is streamlined for all citizens wanting assistance with gaining employment. Vocational Rehabilitation is a major partner, and as such, they are involved in the development of a workable system to serve all Missouri citizens. They are working for integrated services through an Integration Team of partners. Primary concerns are developing a statewide data system accessible by all partners and the shared location of agency offices within 14 regions. In addition, committees of

representatives from partner agencies have joined forces to develop a system that will provide immediate and valuable services to citizens. The committees are addressing issues, such as systemwide performance measures, short-term training certificates, marketing and equal access (architectural and program) within the Career Centers. They are moving forward in all areas.

A full-time supervisor works with partner agencies to ensure that all federal regulations pertaining to Title IV of the Workforce Investment Act of 1998 are followed. The VR supervisor of Workforce Development continues to visit Career Centers and VR offices throughout the state. The supervisor is also involved in the partner committee meetings addressing the systemwide issues previously mentioned. VR, through this continuous involvement with other agencies, is ensuring our consumers are served through access to this universal system.

#### **One-Stop Partnerships**

Locally, counselors still provide the core services for consumers with disabilities. Because of the differences in geographical locations, VR is represented in many different ways. There are centers where counselors visit three to four days a week. Other centers are located in complexes along with a VR office. This allows consumers convenient access to a variety of services. Some Career Centers are not accessible either

#### Interagency Cooperation (continued)

physically or in the provision of programs and services. As a result, VR counselors will either go to a different location or meet consumers at the local VR office. VR counselors travel to approximately 2,000 locations statewide to provide services to consumers.

VR has established a statewide ad hoc committee on accessibility that provided each center with data on assistive technology for persons who are blind, visually impaired and hearing impaired. The committee was formed at the request of MTEC in order to assure all facilities, services and programs become accessible. Recommendations have been given to each center and sent to MTEC. As a result of these visits, the centers are being equipped with speech synthesizers, Braille materials, computers with large monitors and adaptive keyboards and telecommunication devices. In addition, VR provides ongoing cross-training and technical assistance to Career Centers' staff members on accommodations in the workplace.

#### **Centers For Independent Living**

Vocational Rehabilitation continues to work with the Statewide Independent Living Council (SILC) and the Centers for Independent Living (CILs) to provide direct services to people with disabilities.

The 2002-2004 state plan developed by VR and SILC details the tasks and objectives necessary to accomplish the delivery of independent living services that will assist consumers with disabilities to achieve their goals. As part of this collaborative effort, VR and SILC began the process of establishing outcome measures for Independent Living Services (ILS) and Personal Assistance Services (PAS). While the Independent Living program outcomes are still in the development phase, the PAS program has developed outcomes, identified quality indicators and performance measures. Last year, a plan was implemented to improve the PAS program and increase accountability as well as to determine the quality, effectiveness and benefit of PAS services to consumers. During 2003, survey results data were gathered and benchmarks were established to compare against 2004 outcomes.

SILC and the Missouri Assistive Technology Council teamed up as sponsors, along with the Division of Vocational Rehabilitation and other organizations as co-sponsors, to host the 2003 "Power Up" Conference and Expo in April. Conference attendees, such as consumers, service providers, independent living specialists and rehabiliation professionals, learned ways to enhance and promote the independence and quality of life of people with disabilities. SILC was also visible during 2003 as a sponsor and attendee of the SILC Congress, which is a national gathering of all SILCs in the country, to work on SILC's National Action Plan.

#### Interagency Cooperation (continued)

#### Personal Assistance Services (PAS) Programs

Vocational Rehabilitation operates three consumer-directed Personal Assistance Services programs for consumers who require personal care services. The three programs are Non-Medicaid Eligible, Medicaid State Plan and Independent Living Waiver. These statewide programs are administered locally by 21 Centers for Independent Living.

The Non-Medicaid Eligible (NME) program began in 1985. This program enables consumers with physical disabilities, who are "employed or ready for employment," to maintain or seek employment by utilizing personal care services. The program is funded through general revenue appropriated by the state legislature. This program served as the model for the development of the Medicaid State Plan (MSP) and the Independent Living Waiver (ILW) programs.

The MSP program began in 1993. This program targets the Medicaid-eligible population with physical disabilities. Eligible consumers may access personal care services up to a monthly total of \$2,368. This is the maximum dollar amount of services for which a consumer is eligible. The MSP program is funded through a combination of federal and state funds.

The ILW program started on January 1, 2000. This program targets consumers eligible for Medicaid who have physical and/or cognitive disabilities and who require either personal care services above the MSP monthly maximum of \$2,368, specialized medical equipment and supplies, environmental accessibility adaptations or case management.

Personal Assistance Services (PAS) Program Statistics (September 30, 2003)										
	NME Program	MSP Program	IL Waiver Program							
Number of Consumers	150	4,917	600							

Since December 1999, 94 PAS consumers have left nursing homes and are living in the community with the assistance of the PAS program.

#### Transition Services

The Missouri Division of Vocational Rehabilitation continues to work closely with the Division of Special Education in coordinating, planning and providing transition services for students with disabilities in the secondary school setting.

During FY03, the Transition Team, composed of MDVR staff and special education personnel at both the state and local level, continued to provide support and technical assistance regarding transition-related activities and services for students with disabilities in an effort to meet the following charges outlined by the assistant commissioner:

Charge #1:

Develop strategies to increase overall success rates of students with disabilities participating in cooperative school-to-work programs.

Charge #2:

Develop strategies to increase overall participation of students with disabilities participating in cooperative school-to-work programs.

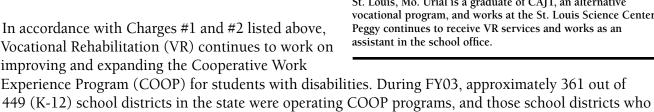

Charge #3:

Develop methods to measure student participation in all transition services.

Charge #4:

Develop strategies for decreasing the dropout rate for students with disabilities from Missouri high schools.

In accordance with Charges #1 and #2 listed above, Vocational Rehabilitation (VR) continues to work on improving and expanding the Cooperative Work

recently signed new COOP agreements increased from 207 in FY02 to 316 in FY03. Although the actual number of students participating in the COOP program decreased from 1,238 in FY02 to 1,064 in FY03, the overall success rate of students participating in the COOP program has continued to increase. In FY03, VR had approximately 609 students who participated in the COOP program and were closed as successfully competitively employed. Therefore, the overall success rate for students with disabilities participating in the COOP program through VR and their local high school was 80.9% for FY03.

Methods to measure student participation in all transition services have continued to improve. VR opened cases on a significantly greater number of students with disabilities prior to graduation during FY03 than in FY02. In FY03, approximately 4,895 students with disabilities were linked to VR and a case was opened prior to graduation/exit from the secondary school setting compared to 3,751 students in FY02. In addition, the overall success rate for students with disabilities who had been referred to VR prior to graduation for transition services has increased. In FY03, to graduation for transition services has increased. In FY03, approximately 799 students with disabilities were

Urial Cain (left) and Peggy Gardner (right) both work to empty recyclable items into the recycling receptacle at the Community Access and Job Training (CAJT) High School in St. Louis, Mo. Urial is a graduate of CAJT, an alternative vocational program, and works at the St. Louis Science Center.

#### Transition Services (continued)

closed as successfully competitively employed. The overall success rate for transition students with disabilities was 80.6% for FY03.

■ In an effort to continue to improve and expand the quality of transition assessment services for students with significant disabilities, VR has continued to provide support and technical assistance to local Community Rehabilitation Programs (CRPs) and Supported Employment Service Providers (SESPs). At the completion of FY03, approximately 134 comprehensive transition assessment Memorandums of Understanding (MOUs) had been developed at the local level with approximately 105 different school districts and 29 various CRPs and SESPs. This reflects a statewide increase of 22 local MOUs and 16 school districts for FY03.

With the knowledge gained from expanded data collection efforts this past year, Vocational Rehabilitation and Special Education personnel at both the state and local level in partnership with other adult rehabilitation agencies and services will continue to encourage opportunities for joint training and technical assistance activities. The Transition Team will also continue to work closely with the Division of Special Education to address Charge #4 (decreasing the dropout rate for students with disabilities) and continue to improve post-school outcomes for students with disabilities.

# Integrated Community Rehabilitation Programs

The division strives to enhance community rehabilitation services throughout Missouri. During this past fiscal year, VR and the Community Rehabilitation Programs (CRPs) collaboratively completed the first full year of an outcome-based service model that emphasizes results and values successful employment

outcomes. The Community Rehabilitation Program/Vocational Rehabilitation (CRP/VR) Team, comprised of VR staff and executives from the CRPs, continues to work on the following issues:

- Continued partnering efforts at the local level and expanding efforts to include administrative staff from VR, the CRPs and the Supported Employment Service Providers (SESPs) along with professional organizations
- Continued quality improvement strategies with employment outcome services
- Assessment of Supported Employment and Community Employment Services by determining program effectiveness

Mitch Surface, former VR consumer, worked with Advent, a CRP. Mitch is now employed at Hastings Entertainment Superstore in Jefferson City, Mo.

- Continued assessment of current vendor requirements regarding utilization, outcomes and cost-effectiveness
- Development of factors to assess the impact of waiting lists (Order of Selection) on CRP services

The division continues to fund a variety of services to approximately 6,767 consumers in CRPs. It should be noted that the division always purchases services from local, nationally accredited, non-profit CRPs and has never owned or operated any of the programs.

Access to community-based services continues to be a division priority. As a result, all CRP programs emphasize community integration.

A complete listing of all division-approved CRPs can be found on page 41.

# Improved Availability for Supported Employment

The division provides supported employment services to a diverse population of consumers, as indicated by Figures 4-6 (pages 20-21). Supported employment is defined as competitive work in an integrated work setting with ongoing support services for individuals with

the most significant disabilities. During FY03, 77 percent of consumers who received supported employment services and exited the program were successfully employed.

Figure 4 (this page) provides a breakdown of the disability categories of consumers who exited the program both successfully and unsuccessfully after receiving supported employment services.

Figure 7 (page 21) provides the total number of Supported Employment Service Providers (SESP). As of FY03, all counties in Missouri are being served by SESPs. This expanded coverage offers choice for consumers.

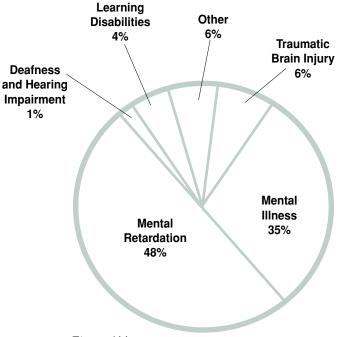

Figure 4\*\*

### Other Supported Employment Statistics

The division places an emphasis on the development of natural support systems for consumers who participate in supported employment. This reduces the costs associated with supported employment and job coaching. Figure 8 (page 21) shows the average costs of services, hourly wages and other statistics for supported employment.

#### **Consumer Satisfaction**

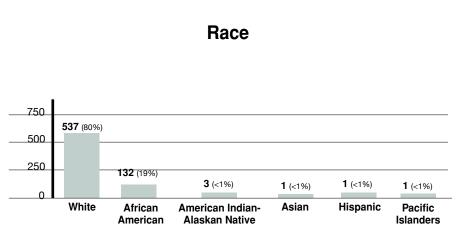

As noted on the chart on page 31 of this report, 100 percent of consumers who participated in supported employment and who responded to the satisfaction survey felt that the division treated them with respect. And, 97 percent felt that VR policies were fair.

<sup>\*\*</sup>Percentages based on the number of consumers who exited the program both successfully and unsuccessfully after receiving SESP services.

#### Improved Availability for Supported Employment (continued)

#### Supported Employment Race and Gender of those Served\*\*

## Innovation and Expansion Grants

Vocational Rehabilitation (VR) continues to improve its methods of delivering services. An area of emphasis for VR has been to work collaboratively with agency partners to effectively and efficiently deliver seamless services to consumers. Innovation and Expansion grants allow VR the opportunity to explore new strategies and methods for this type of service delivery.

In November of 2002, VR awarded five Innovation and Expansion grants to providers around the state based on their ability to meet the requirements of the grant application. Grant requirements focused on ways in which CRPs and SESPs could effectively assist VR counselors with case management activities to improve service delivery. Grant recipients were Advent Enterprises, Lakes Country Resource Centers, Learning Opportunities, The Rehabilitation Institute and Truman Employment Service.

The grant maximum is \$56,250 with the federal share at \$45,000 and a required local match from the recipient of \$11,250 per year. The grants cover a two-year period from November 2002 to October 2004 with a renewal application process for the second year. All five first-year recipients have been renewed.

Expected outcome measures for the grants, at a minimum, include:

- Improving the timeliness of eligibility determination and service delivery;
- Increasing successful competitive closures;
- Reducing unsuccessful closures; and
- Increasing coordination and collaboration with local VR offices and other community partners.

During the first year of the grants, the five providers served over 1,000 consumers with further growth anticipated for the second year.

## Assistive Technology

In FY03, the division provided a variety of assistive technology services, devices and equipment to 1,670 individuals for a total cost of \$3,318,018.

Assistive devices are purchased by the division to assist consumers with increasing, maintaining or improving functional capabilities. These may be commercially purchased or modified/customized by a specialist in technology. The devices may be as simple as a modified door handle or as sophisticated as a voice-controlled computer system. Other types of assistive devices include: prosthetic and orthotic equipment; hearing aids; eyeglasses; wheelchairs and other powered-mobility equipment; walkers; braces; crutches; computer equipment (e.g. adaptive keyboards, voice-activated controls and specialized software); vehicle modifications; and home modifications.

Assistive technology services include: evaluation design, customization, adaptation, maintenance, repair, therapy, training or technical training that assists an individual with a disability in the use of an assistive technology device.

The Telecommunication Access Program (TAP), implemented by the Missouri General Assembly, has become an excellent resource for division counselors. This program provides adaptive equipment for persons whose disability prevents them from using traditional telephones. The program also provides telecommunication access to the Internet and e-mail in the home for individuals unable to communicate via computer due to a disability. TAP has saved the division significant costs of purchasing these services.

Within the seven regions of Missouri, the division has counselors who specialize in information technology. These specialists serve as consultants for other division staff and consumers regarding:

- the Americans with Disabilities Act and assistive technology.
- the availability of assistive technology services for students in secondary education programs.
- the availability of services/vendors in particular regions.
- TAP and the demonstration equipment sites funded by the program that are located in the Centers for Independent Living (CILs)\* around the state.

In April 2003, the Missouri Assistive Technology Council cohosted the statewide "Power Up" conference that was open to providers, consumers and division staff. The division's technology information specialists attended, as well as a number of providers and exhibitors. The conference was successful in providing consumers and professionals with an opportunity to view state-of-the-art technology and equipment.

\* See page 40 for CIL listings.

# Underserved Populations and Workplace Diversity

One of the top priorities for the council and the division continues to be reducing the overall number of people who do not complete the VR program and reducing the unsuccessful outcomes for traditionally underserved populations (i.e. primarily African American and Hispanic consumers). Figure 9 (page 25) reflects the closure percentages by race for FY02 and FY03. This chart illustrates that African American consumers continue to represent disproportionately higher rates of outcomes that are not successful.

The division remains committed to improving employment outcomes and reducing the dropout rate of consumers from underserved populations. For example, a pilot program that was designed to retain consumers at risk of leaving VR services has become a permanent program. Retention counselors now work with "at-risk" consumers to remove barriers to services and employment. Other staff, such as intake counselors, assist in locating "lost" consumers. Innovation and Expansion grants were awarded to a number of Community Rehabilitation Programs (CRPs) to also assist VR in contacting "lost" consumers and assist with removing barriers to services.

#### **Cultural Diversity Team**

To work on issues relating to underserved populations, the assistant commissioner appointed a diverse group of staff to serve on the Cultural Diversity Team. This team has worked to develop strategies for:

- increasing the numbers of underserved populations using VR services;
- reducing the disproportionate numbers of underserved populations dropping out of VR services;
- improving the rate and quality of employment outcomes for underserved populations;
- improving recruitment and retention practices of culturally diverse consumers and employees for the entire division; and
- distributing information to underserved populations to have a positive effect on the above charges.

The Cultural Diversity Team has expanded its focus to include the entire Division of Vocational Rehabilitation by adding to the team four employees of Disability Determinations Services. The team meets several times a year to work on the above issues.

#### Underserved Populations and Workplace Diversity (continued)

#### Diversity in the Workplace

The division continues to work hard to recruit, hire and maintain a diverse workforce. Figure 10 (page 25) shows the specific categories of division employees as of September 30, 2003.

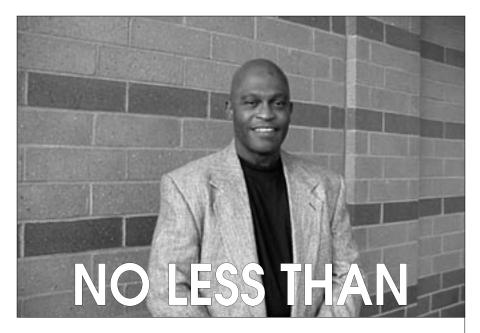

The division has an extensive plan to recruit individuals with culturally diverse backgrounds. All job openings are listed with the division and "Missouri Works" web pages, and nearly all vacancies are advertised in local newspapers as well as traditional African American and Hispanic newspapers. All division counselor vacancy notices are now sent to various Historically Black Colleges and Universities (HBCU's), such as Lincoln University-Jefferson City, Mo.; Southern University-Baton Rouge, La.; Fort Valley State College-Fort Valley, Ga.; and Mississippi State-Jackson, Miss. Recruitment contacts have been made with all colleges in Missouri that have a high population of minority students. The division continues to participate in recruitment activities, career fairs and various community activities.

The division also strives to recruit individuals with disabilities. All district supervisors and counselors receive job vacancy notices. Many of the individuals referred by staff are interviewed and hired or participate in field experiences and internships sponsored by the division. In fact, VR intensified its recruitment efforts to include paid internships in 2003. At the time of this report, approximately 16 percent of the counselor positions are held by persons with disabilities.

In addition to the division's recruitment efforts, all staff are participating in cultural diversity training. This on-going training is a positive outcome of one of the Cultural Diversity Team's recommendations and utilizes a state-contracted diversity trainer. Feedback from this training has been positive. Diversity training will continue throughout next year and will be held regionally to defray travel expenses.

#### **Consumer Satisfaction**

The division's consumer satisfaction survey (page 31) illustrates that 96 percent of African American consumers felt that they were treated with respect. Other results showed that 94 percent of African Americans responding to the survey said they were involved in making choices about their career goals and VR services. Ninety-four percent also felt their VR experience was good and that VR helped them to become employed.

# SUCCESS!

# A BOOST FROM VR HELPS CONSUMER TERRENCE FREEMAN ACHIEVE HIS OCCUPATIONAL GOALS

"I lost everything," says Terry Freeman. "I was living in the gutters and eating out of the garbage."

Living on the streets is just one of the byproducts of substance abuse — Terry has firsthand experience with many. His disability began more than 30 years ago when as a teen in the '60s, he was part of the drug culture.

Terry received treatment for both his drug and alcohol addictions; he even stayed clean for almost a decade from 1988 to 1997. Then his mother passed away, and Terry turned back to drugs and alcohol to ease the grieving process.

But those days are over. Terry has gone from surviving in the gutters to maintaining a 3.0 grade point average at the Kansas City Kansas Community College. He is working on his associate's degree in substance abuse counseling and plans to go on for a bachelor's degree in a vocational rehabilitation or social work area.

Clean and sober since October 2000, Terry learned of the Vocational Rehabilitation (VR) program during substance abuse treatment. He credits VR with being a "vital part" of his recovery.

"I needed someone to reach back and grab my hand, and VR did that," Terry says. VR, along with a Pell

Terrence Freeman, consumer, is currently working on his associate's degree in substance abuse counseling at Kansas City Kansas Community College with assistance from VR.

Grant, pays for his college expenses. But Terry says VR has been more than just a financial resource. "They have nurtured me," he says.

Terry has developed a strong relationship with his VR counselor, David Showalter, and Larry Allen, the district supervisor of the Downtown Kansas City VR office.

"They help to keep my self esteem up, and they don't make me feel helpless," Terry says. "David does a lot for me, even if it means just being an ear sometimes. He knows me well enough to keep me going through the program; he knows what to say."

For his part, David respects Terry for what he has accomplished. "Terry comes from a difficult background and has made his share of mistakes," David says. "He has shown true courage and commitment to turn his life around and reach out to help others."

Terry says Larry, the district supervisor, gives him "realms of possibilities and hope." "Larry has told me something that no one ever has — that I have 'raw talent and focus and discipline," Terry says.

Terry has a full life. Not only does he attend college, sometimes spending up to three hours a day commuting by bus, he is an ordained minister who volunteers in his community. He runs Alcoholics Anonymous and Narcotics Anonymous meetings and is a sponsor for three other persons with drug and alcohol dependencies who are in the 12-step recovery program. Terry recently represented the Missouri Division of Vocational Rehabilitation in Washington, D.C., at the National Training Workshop for New Leadership Development.

Terry says his philosophy in life is: "No matter how low you get down in the gutter, even in the sewer, make a decision to turn your life over to a higher power than yourself. Stay firm in your decision."

#### Consumer Satisfaction

The council's Program Evaluation Committee continues to survey and monitor consumer satisfaction. A prepaid-postage card with a quick, eight question survey is sent to all eligible consumers immediately after their cases are closed.

Survey results continued to be positive during FY03. For example, of the consumers surveyed who received services, 99 percent felt that they were treated with respect and 98 percent indicated that they were involved in making choices concerning their employment goals and services. All of the results are categorized in groups, such as statewide totals, disabilities, gender, race, etc. The response rate from consumers who received services was nearly 18 percent; their survey results are listed on page 31. Separate survey results for eligible consumers who left the program before receiving services can be found on page 32; their response rate was 5 percent.

Survey Card • Sample 1 (completed by consumers who received services and exited the system successfully in employment or unsuccessfully)

Please mark X in the box that you think is appropriate for each statement below. Thank you for taking time to fill out and return this Survey Number: Check if completed by family member. Somewhat Strongly Strongly Somewhat Agree Agree Disagree Disagree 1. The VR staff treated me with respect and courtesy. 2. Overall, my VR services were provided in a timely manner. 3. My counselor helped me to understand my disability and how it might affect my future work. 4. I was involved in making choices about my goals and services. 5. My experience with VR was good and I would recommend it to others. 6. VR policies were fair. 7. VR services have helped or will help me get a job. 8. (Optional) How could VR have served me better? My experience with 6. VR policies were fair. 7. I'm not using VR services because:\* Survey Card • Sample 2 (completed by consumers who were eligible but were closed before receiving services) stThe only question that differs from the "Sample 1" survey postcard.

#### Consumer Satisfaction (continued)

In addition to the consumer survey card, the division gathers input from consumers through two other question-naire cards. Fashioned after the original consumer survey cards (Samples 1 and 2, shown on page 29), these cards reach out to consumers involved with Centers for Independent Living (CIL) and division Impartial Hearings. The results from the CIL surveys (card not shown) confirm the level of consumer satisfaction with the centers. Ninety-six percent of consumers felt that staff listened to their concerns, and 95 percent of consumers would recommend their center to friends or family in need of services. The Impartial Hearing questionnaire card (Sample 3, shown below) is sent to consumers who have participated in an appeal (due process hearing) regarding rehabilitation services. This particular card evaluates how fairly consumers felt they were treated by the hearing process and the Impartial Hearing Officer.

Survey Card • Sample 3 (filled out by consumers who participated in an impartial hearing)

Please mark X in the box that you think is appropriate for each statement below. Thank you for taking time to fill out and return this survey.
